ActiveWrap

Patented Design for Targeted Relief

Knee

Designed for injury-specific adjustability and freedom of movement, ActiveWraps® provide quality care and preventative treatment for all activity levels.

Shoulder

Superior quality compression wraps, complete with specially formulated hot/cold thermal packs, are anatomically designed and adjustable to provide precise treatment.

Wrist

- Innovative glycerine gel component ensures lightweight, flexible therapy around the entire injury
- Reusable hot/cold thermal packs provide interval contrast heat and cold treatments
- Active Medical Plush™ material provides excellent insulation for the thermal packs
- Adjustable thermal packs can be positioned inside the wrap for precise treatment of affected area
- Use without thermal inserts to provide support and retain therapeutic warmth

Back

Indications: Post-Op Swelling; Muscle Soreness & Stiffness; Sprains & Strains; Joint Discomfort; Tendonitis; Arthritis
