

DERMANET® GTL
silicone wound contact layer

Introducing **Dermanet GTL**, with the strength of Dermanet and the softness of silicone. Dermanet® GTL Silicone Wound Contact Layers are the perfect option for wound protection.

DERMANET® GTL

silicone wound contact layer

features and benefits:

- Helps to facilitate fluid transfer and provide fixation and protection to the wound bed during dressing changes
- Ideal for use in traditional wound applications
- Easy 1-2-3 Release Liners on larger sizes
- Rounded edges to reduce "roll-up"
- Open mesh design is coated with a soft silicone adhesive
- Dressings may be removed without causing trauma to the wound or to the surrounding skin
