Reimbursement Disclaimer

Information related to HCPCS or ICD-10 Codes for use in determining the proper Medicare or Medicaid reimbursement status for any DeRoyal® product listed in this catalog represents the best efforts of DeRoyal Industries, Inc. in determining relevant HCPCS Codes and corresponding diagnoses for certain of DeRoyal's products. This information is provided as a no-cost service to customers of DeRoyal. The information is compiled from the descriptors and functions associated with the HCPCS and a review of ICD-10 Codes from publicly available information and anecdotal information obtained from sources familiar with the billing process as indicated above. However, only the appropriate Medicare authority can ultimately determine the appropriateness of reimbursement of a particular product, for a particular patient, given the appropriate diagnosis. DeRoyal strongly cautions the users of this information to verify the applicability of a given HCPCS and/or ICD-10 Codes in a particular situation prior to seeking reimbursement for any DeRoyal product.

Burn and General Wound Care

Super Absorbents

Super Absorbent dressings are multi-layered dressings designed to manage highly exuding wounds. DeRoyal's Sofsorb® technology products and Samson™ sheets are available in a variety of shapes and sizes, allowing for customization to each patient's needs and supporting ease of use.

Sofsorb® Absorptive and Specialty Shaped Dressings

Sofsorb® is a highly absorbent, multi-layered 1-piece dressing. The dressing can be used dry or wet and secured in place by Stretch Net™ elastic bandage. Available in over 50 sizes and configurations, including various anatomical shapes and pediatric sizes.

Non-Adherent Super Absorbent Wound Dressings

- Innovative 5-layer design
- Rounded and sealed edges eliminate frayed edges, loose threads, and linting
- Tapered limb configurations conform to curved and hard-to-dress areas without unnecessary bulk
- Supports wound site protection from further trauma
- Soft pliability allows for range of motion exercises during recovery
- Appropriate for most wounds of various etiologies
- Can be used up to 7 days under compression for low to highly exudative environments
- Cost effective solution compared to traditional dressings which require frequent dressing changes
- Saline or topical agents may be applied prior to use

Sofsorb® 5-Layer Design

5 layer construction:

- 1 Non-adherent wound contact layer
- 2 StayDry™ Liner that permits passage of wound drainage to help keep periwound skin dry and prevent maceration at wound site
- 3 Center layer that absorbs wound drainage
- 4 Cellulose layer that wicks drainage horizontally along pad to increase dressing absorption capacity
- 5 Air-permeable backing for strength and durability

Samson™ Sheets Non-Adherent Permeable / Impermeable Sheets

DeRoyal offers a unique multi-layered burn sheet designed with several features:

- First layer is composed of a non-adherent contact layer to limit adherence to the wound area
- Second layer is composed of several sheets of compressed cellulose for exudate absorbency
- Third layer provides reinforcement to support use as a transfer or draw sheet
- Optional permeable or impermeable backing

Impermeable

Exudate Management

Specialized Absorbents

One-Plus Gauze Dressings

A One-Plus dressing is made by serging 1 layer of fine mesh to several layers of wide mesh.

- 2-sided design for Wide Mesh or Fine Mesh gauze wound contact options
- Wide Mesh side supports debridement needs
- Fine Mesh side limits wound adherence and supports exudate management
- Eliminates the excessive time required to pre-cut and layer gauze
- Available in a variety of sizes and ply options

Gauze Dressings

Item # Quantity	Description	Packaging	
10-5500	18" x 18" 6-ply	2/Pk, 50 Pk/Cs	100/Cs

Exudate Management

Standard Absorbents

Muslin Gauze Absorbent Towel

Muslin Gauze is an absorbent towel comprised of 3 layers of material: 1-ply cheesecloth, 4-ply wide mesh gauze, and 3-ply fine mesh gauze with serged edges.

Muslin Gauze

Item #	Description	Packaging	Quantity
10-6388	18" x 27"	1/Pk, 50 Pk/Cs	50/Cs
10-6548	18" x 35"	1/Pk, 50 Pk/Cs	50/Cs

Gauze Fluff Absorbent Pads

Gauze fluff pads provides absorptive padding that is appropriate for:

- Heavily exudating wounds (e.g. burn)
- Wiping and debriding wound areas

Gauze Fluff

Exudate Management

Non-Adherent Absorbent Dressings

Non-Adherent Absorbent Dressings

Multipad™ dressings are non-adherent, highly absorbent wound dressings. The design is composed of a non-woven rayon pad between 2 non-adhering polypropylene contact layers.

Multipad™ Non-Adherent Wound Dressings

- A multi-layered, highly absorbent wound dressing
- Helps protect fragile granulation tissue and prevents wound trauma
- Non-linting
- Use in place of gauze and tape when more absorbency is needed
- Can be cut for oddly shaped wounds

Product #	Description	Packaging	Quantity	HCPCS

Exudate Management

Standard Non-Adherent Absorbent Dressings

Standard Non-Adherent Dressings

Standard non-adherent dressings can be applied directly to the wound or incision, supporting wound healing and limiting wound adherence. The perforated design allow for air and fluid flow and can be cut to fit the wound or incision.

Oil Emulsion Non-Adherent Absorbent Wound Dressings

- A sterile, knitted cellulose fabric dressing impregnated with oil emulsion blend
- Non-adherent to wound site
- Non-occlusive, allowing flow of exudate away from wound site into secondary dressing
- Helps maintain a moist wound environment
- Can be cut to shape or size

Securement / Closure

Securement

Securement / Closure

DeRoyal offers a variety of dressing securement and wound closure options. Securement options include DeRoyal's proprietary Stretch Net™, Apex™, and Bias Stockinette dressing products. The Episeal™ wound closure strips provide clinicians with wound and incision closure options.

Stretch Net™ Tubular Elastic Retention Dressings

- Tubular elastic retention bandage that holds dressings in place without adhesives or tapes
- Allows easy wound inspection and quick application for wounds with frequent dressing changes
- Provides maximum aeration to wound
- Ideal for patients with fragile skin or adhesive allergies

Episeal® Wound Closure Strips

- Wound closure strips incorporate a non-irritating adhesive coating
- Provides secure attachment without the need for additional adhesive products (i.e. benzoin tincture)
- Rounded corners limit edge lift and supports securement
- High breathability and tensile strength
- Flexible and conformable

Compression

3-Layer Compression System

Compression

The DeRoyal system offers specialized compression wraps designed to aid in lower extremity wound healing. The DeWrap™ system is a 3-layer graduated compression system. Unna Boot is a specialized, zinc oxide impregnated gauze wrap. Both the DeWrap™ system and the Unna Boot are comfortable, conformable, and easy to apply.

DeWrap™ 3-Layer Compression System

- 3-layer component compression system that delivers sustained, graduated compression for lower extremities
- Reduces venous hypertension and aids in the healing of venous leg ulcerations
- Application instructions available to demonstrate how to achieve different levels of compression
- Not made with natural rubber latex

3-Layer Compression System:

- 1** Absorptive layer is absorbent, conformable, and protective
- 2** Elastic layer provides breathability and graduated pressure
- 3** Cohesive layer is self-adhering to secure bandage system and provides graduated compression for up to 7-day wear time

Jet Lavage Debridement

JetOx™ Debridement System

Jet Lavage Debridement

JetOx™-ND initiates wound cleansing and debridement through compressed air and oxygen. The JetOx™-ND system administers a cool, gentle stream that creates a desensitizing effect.

JetOx™-ND Jet Lavage Wound Cleansing & Debridement System

- Simple, user-controlled pressure
- Quickly and efficiently cleans and debrides wounds
- Delivers a cool, gentle fluid jet stream
- Microdrops between 5-200 microns accelerated up to 200 meters per second
- For patients sensitive to other forms of debridement
- Compatible with standard gas outlets (portable and wall) and saline dispensers
- Ideal for bedside application
- Fully disposable, limiting cleanup of the work environment

Advanced Wound Care Dressings

Antimicrobial Dressings

Algidex Ag®+

Algidex Ag®+ Antimicrobial Wound Dressings

Algidex Ag®+ is a unique combination of silver, alginate, and maltodextrin designed to support an optimal moist wound environment.

- Provides quick and sustained antimicrobial activity against a broad spectrum of microbial organisms for up to 7 days.¹
- Does not require activation or the use of sterile distilled water
- Up to 7 day wear time limits frequent dressing changes
- Inhibits bacterial cell division which minimizes the development of resistance²
- Gentle and non-irritating

Algidex Ag[®]+ Foam Dressings

- Non-adherent antimicrobial foam dressing
- Used for low to moderate draining wounds
- Absorptive to help reduce risk for periwound maceration
- Thick, soft construction for conformability and comfort

Product #	Description	Packaging	Quantity	HCPCS
46-AG22	2" x 2" Foam Back	1/Pk, 5 Pk/Bx, 10 Bx/Cs	50/Cs	A6209

Multidex®

Multidex® is a hydrophilic maltodextrin wound dressing clinically proven to maintain a moist environment beneficial for granulation tissue growth and epithelial proliferation.² Multidex® fills the wound site, rapidly mixing with the exudate to form a protective coating that maintains an ideal moisture balance to protect against dehydration.

Multidex® Maltodextrin Wound Dressings

Multidex® dressing is a sterile maltodextrin composition with 1% ascorbic acid that supports an optimal wound healing environment across a variety of wound types. Available in gel or powder options, Multidex® Gel dressing is ideal for use on low to moderately exuding wounds. Multidex® Powder dressing is ideal for use in highly exuding wounds.

- Rapidly mixes with exudate within the wound to form a protective coating
- Maintains an ideal moisture balance to protect against dehydration
- For use on most wound types, including infected or hard-to-heal wounds
- Non-toxic and not systemically absorbed
- Helps control odor while decreasing exudate
- Penetrates all wound irregularities to fill tunneling and undermining
- Softens necrotic tissue to facilitate debridement

Foams – Absorbent Multi-Layer

Polyderm™

Polyderm™ Silicone Foam Dressings

Polyderm™ dressings are non-adherent to wounds, highly absorbent, polyurethane foam dressings.

- Ideal for moderate to highly exudative wounds
- Thick, soft construction is conformable and comfortable
- Suitable for wounds requiring protection and pressure redistribution
- Available in a variety of shapes, sizes and with and without adhesive borders

Foams – Absorbent Multi-Layer

Polyderm™

The Pressure Injury Problem:

2.5 Million people affected annually. Elderly are the most vulnerable.³

Hospital-acquired pressure injuries cost an estimated \$10,708 per patient, resulting in **\$26.8 billion spent in the US each year.**³

Estimated 60,000 individuals die annually as a direct result of pressure injuries higher mortality rate than car accidents, which kill 42,000 annually.⁴

No statistic can capture the reduction of **quality of life** such as severe pain, loss of independence, embarrassment, and increased hospital stay.

**Exceptional Care,
Accessible Price**

Polyderm™ GTL⁵ Silicone Foam Dressings

Breathable Protective Layer

The polyurethane adhesive layer glides across external surfaces, protecting wound from shear damage while allowing for moisture to escape

Superabsorbent Layer

Cushioned hydrophilic layer draws and locks exudate away from wound surface and protects surrounding periwound from maceration

Spreading Layer

Nonwoven fabric assists in distributing fluid throughout the full area of the dressing to achieve maximum absorptive capacity

Foam Layer

High-density hydrophilic foam wicks exudate away from wound surface and helps to disperse localized pressure across entire wound dressing

Perforated Silicone Layer

Gentle and atraumatic, this contact layer conforms to the anatomical contours of the skin, supplying elastic protection from shear force

Foams – Absorbent Multi-Layer

Contact Layer

Non-Adherent

Contact Layers

Contact layers are non-adherent, permeable liners that conform to the wound bed, prevent trauma to fragile tissue, and allow the passage of exudate to a secondary dressing. Contact layers can also be used in combination with Negative Pressure Wound Therapy.

Dermanet® Non-Adherent Contact Layer Dressings

Dermanet® wound contact layers provide wound protection. Dermanet® and Dermanet® Ag+ (containing ionic silver) dressings are made from a proprietary blend of high-density polyethylene.

Contact Layer

Antimicrobial Contact Layer / Dressings

Dermanet® Ag+ Overview

Dermanet® Ag+ is a combination of Dermanet® wound contact layer and Algidex Ag®+ technology.

- A unique combination of silver alginate, maltodextrin, and Dermanet®
- Provides quick and sustained antimicrobial activity against a broad spectrum of microbial organisms for up to 7 days¹
- Does not require activation or the use of sterile distilled water
- Reduces trauma during wound dressing removal
- Decreases odor and creates a moist environment conducive to healing

Film Dressings

Transparent film dressings are adhesive, semipermeable dressings that are waterproof and impermeable to bacteria and contaminants. Films incorporate a high moisture vapor transmission rate (MVTR) design, allowing vapor and gas exchange at the wound bed.

Transeal® transparent film dressings are polyurethane films coated with an acrylic pressure-sensitive adhesive. Transeal® is highly permeable to gases and moisture vapor, allowing the skin to breathe and moisture to transmit from the site while being impermeable to water and bacteria.

The image shows a medical storage cabinet with glass doors. Inside, there are shelves and drawers. On the shelves, there are several DeRoyal PRO-II negative pressure wound therapy pumps. Each pump is white with a clear reservoir and a blue label that reads 'DeRoyal' and 'PRO-II'. The drawers are open, revealing several cardboard boxes, likely containing supplies for the therapy. The text 'Negative Pressure Wound Therapy' is overlaid in the center of the image.

Negative Pressure Wound Therapy

Negative Pressure Wound Therapy

Continuum® NPWT Inventory Management

Continuum® NPWT System

DeRoyal's Continuum® Negative Pressure Wound Therapy (NPWT) solution aims to provide the highest level of patient care and customer satisfaction through the application of proprietary advanced clinical technologies. Combining RFID and GPS automation, DeRoyal's paperless Continuum® system allows for real-time tracking of NPWT devices, EMR integration, and inventory management that results in a quicker and safer patient discharge to home.⁷ These technologies combined with DeRoyal's powerful, simple to use, low profile negative pressure therapy unit create optimal, efficient patient outcomes.

CONTINUUM®
NPWT

One Patient, One Pump.

The DeRoyal® Negative Pressure Wound Therapy (NPWT) system, enabled with Continuum® Radio Frequency Identification (RFID) and GPS technology, is a state-of-the-art real-time supply chain management system providing anytime/anywhere dashboard access to identify negative pressure device location.

Use the NPWT Continuum® system to streamline the discharge process and enhance supply chain logistics.

Negative Pressure Wound Therapy

Continuum® NPWT Inventory Management

SCIENTIFIC/CLINICAL Benefits of VPT® technology

Variable Pressure Therapy (VPT®) technology is proven to be the most effective form of NPWT, providing a simple, comfortable and efficient wound treatment system.⁸

CARE + REVENUE Improving Care While Reducing Cost

The DeRoyal® NPWT system and protocols, enabled with the Continuum® inventory management system, ensure optimal outcomes at reduced cost levels.

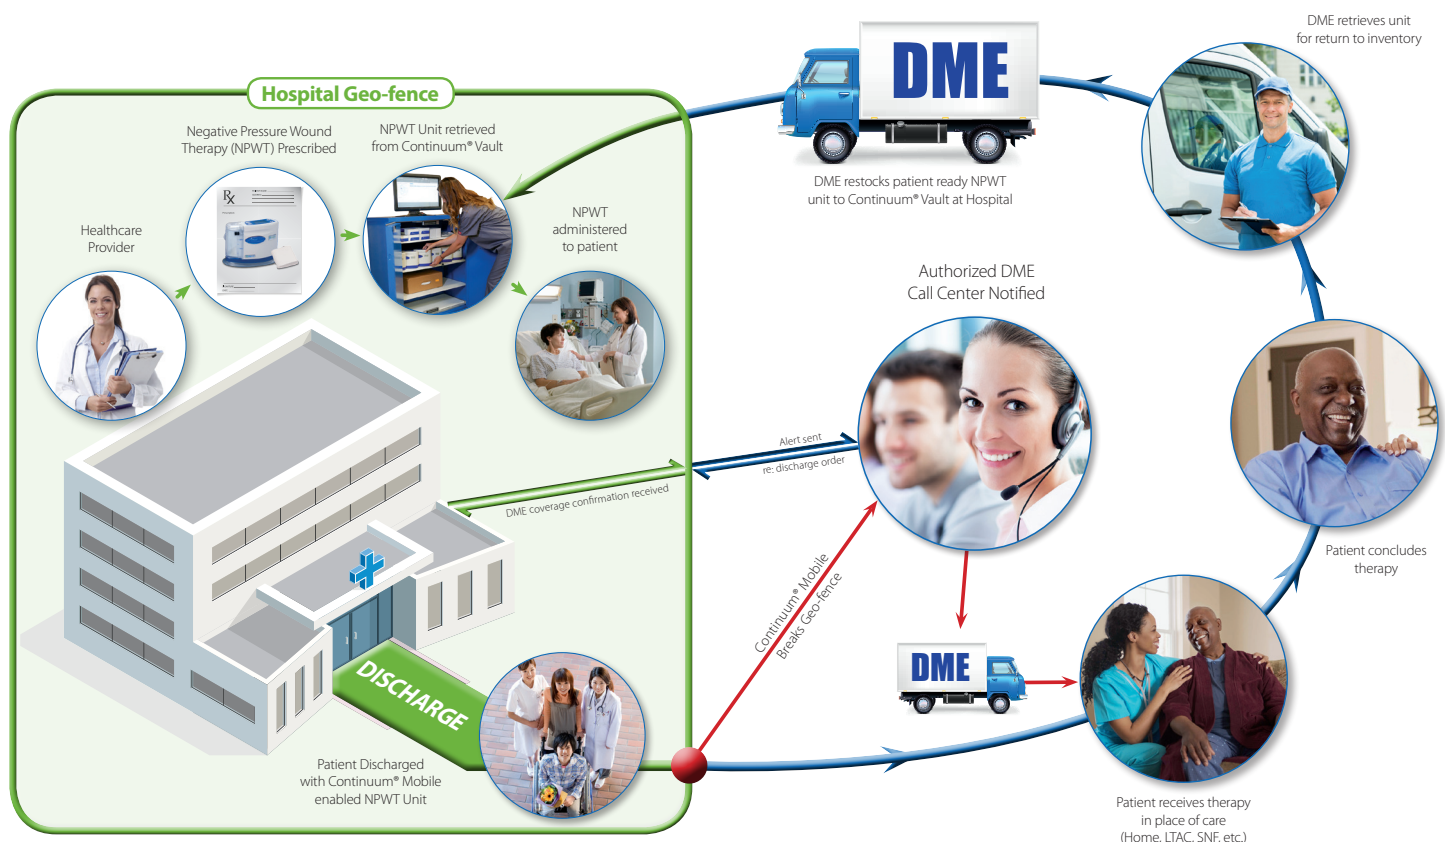

LOCATE & TRACK GPS & RFID Technology

State of the art tracking systems provides detailed patient reporting, real-time supply chain management, and anytime/anywhere dashboard access to identify negative pressure device location.

INCREASED Continuity of Care

Provide continuity of care with DeRoyal's breadth and depth of product line offerings, software and hardware innovations, and devices that can seamlessly transition from hospital to home.

Hospital to DME Process

Negative Pressure Wound Therapy

Traditional Prospera® NPWT

Prospera® PRO-II™ NPWT System

The Prospera® PRO-II™ system combines powerful negative pressure therapy with hassle-free portability and clinical ease of use. Near silent operation, large, easy-to-read, color-coded display screens, and a long battery life helps increase comfort and satisfaction for patients. Offering both VPT® (Variable Pressure Technology) and Continuous settings, the Prospera® PRO-II™ is designed to provide personalized therapy treatment that can be used for a wide variety of wound etiologies.

Prospera® PRO-II™ Negative Pressure Wound Therapy Device

- Promotes wound healing by removal of wound exudate, debris, and infectious materials^{9,10}
- Promotes more effective blood flow to wound site^{9,10,11}
- Controls the zone of hypo-perfusion surrounding the wound edge eliminating concern for ischemia¹⁰
- Increases proliferation of new granulation tissue^{10,11,12}
- Gradual pressure cycling (in 5 mmHg increments)⁸
- Lower than traditional pressures provides gentle tissue massage resulting in less pain and better outcomes^{10,12}

E2402

E2402

Benefits of VPT® Technology

Intermittent negative pressure increases blood to the wound site more effectively than continuous negative pressure, and proliferation of new granulation tissue is significantly higher.^{9,10} Prospera® NPWT devices with VPT® technology deliver comfortable, variable pressure therapy.

- Customizable time and pressure settings.
- Calibrated to increase and decrease in comfortable increments
- Limits painful high and low pressure spikes.^{10,11,12}

Negative Pressure Wound Therapy

Traditional NPWT Kits & Accessories

Prospera® PRO NPWT Dressing Kits

Kits: DeRoyal® NPWT kits come in a wide variety of sizes and options with each containing a filler, dome connector, and film dressing. DeRoyal's complete dressing kits also each include a measuring tool.

Black Foam: DeRoyal's black foam is a hydrophobic open-pore reticulated foam designed to promote wound healing by removing excess exudate and infection debris, and supports wound contracture when used in combination with NPWT therapy units.

White Foam: DeRoyal's white foam is an open-cell hydrophilic foam that can be used to protect delicate structures or be applied to undermining and tunneling in a wound when using NPWT therapy.

AMD Gauze: DeRoyal's antimicrobial gauze is hydrophilic and designed to absorb and retain fluid. It is effective for treatment of wounds with low to moderate drainage.

**PROPEL®
TECHNOLOGY**

- Supports efficient fluid management and accurate negative pressure delivery across all therapeutic pressure ranges
- Technology compatible with existing DeRoyal® negative pressure devices
- Technology performance supports wound dressing seal variability
- Hydrophobic Filter filters external air, limits particulate contamination into the dressing site, and protects from external fluid (e.g. showering)

Negative Pressure Wound Therapy

Traditional NPWT

Prospera Flex® NPWT System

A disposable, single-use NPWT system containing a device, a canister, tubing, and a wound dressing interface. It is indicated for use on a variety of wound types, including closed surgical incisions. It can be used with dressings cleared for NPWT, providing clinicians flexibility to choose the most appropriate dressing for their patients.

NPWT Benefits Include

Acts as a Barrier to External Contamination^{14,15}

Provides an environment to promote wound healing^{14,15}

Helps to hold Incision Edges Together¹⁶

Removes Fluids and Infectious Materials^{14,15}

Decreases Lateral Tensions of Sutured/Stapled Incisions^{16,17}

Reduces Edema¹⁵

Prospera Flex® Single-Use 7 Day NPWT Device

- » Single button user interface
- » Provides 7 days of NPWT
- » Delivers -80 mmHg of continuous NPWT
- » Audible and visual alarms
- » 45 cc flexible canister
- » Canister integrated tubing (4ft)
- » Discrete carrying case
- » AA battery powered

Prospera Propel® FX Dome

- » Incorporates Prospera Propel® Technology for efficient fluid removal
- » Self-sealing dome prevents fluid from entering wound interface when tubing is not connected
- » Connector at dome allows for convenient tubing detachment, supporting patient daily activities (showering, clothing, etc.)

Prospera Flex® NPWT System is Compatible with Lumitech® Incisional Wound Dressings

- Distributes pressure evenly across the dressing
- Reduces lateral tension when used over closed incisions
- Available together in a post op convenience kit for ease of ordering and application

Negative Pressure Wound Therapy

NPWT Compatible Dressings & Accessories

Lumitech® Incisional Dressing

The Lumitech® multi-layer incisional wound dressing is intended to manage post-surgical wounds with low to medium exudate levels. The dressing incorporates Lumina® Adhesive Technology, a patented UV switchable adhesive that supports a strong seal and long wear time yet allows for gentle dressing removal. This helps prolong dressing usage while minimizing painful dressing removal.

Innovative Features

- Peel and place, sterile multi-layer absorbent design
- Integrated Lumina® Adhesive Technology
- Optimized design for application over various incision site locations
- NPWT compatible dressing with dome site positioning flexibility
- Available in a variety of sizes

LUMITECH®

Multi-Layer Dressing Composition

1. Integrated wound contact layer with extended edges for increased skin integrity and patient comfort¹⁸
2. Non-woven fibers support up to 20 ccs of exudate absorption at the wound site when used independently or with NPWT¹⁹
3. Polyurethane foam assists with pressure distribution when used with NPWT¹⁹
4. Polyurethane film incorporating Lumina® Adhesive Technology provides flexible, breathable, water-resistant, contaminant-blocking protection with a strong seal and gentle removal
5. Release liners and carrier layers for ease of application

Lumina® Adhesive Technology Benefits²⁰

- » Adhesive adheres as strong as acrylic dressings, supporting long wear time in unswitched state
- » Adhesives releases more gently than silicone following UV light exposure, minimizes pain and periwound trauma at dressing removal

**Compatible with the DeRoyal® Prospera Flex®
NPWT Single-Use System**
